

Where Technology and Experience Work Together

# PointOne

## The Solution

We provide advanced fleet and fuel management solutions that are designed to:

1. Optimize the use of your fuel/fleet assets
2. Maximize corporate safety and security
3. Reduce operating expenses
4. Reduce vehicle maintenance costs
5. Increase revenue

**DRIVER'S RISK PROFILE**

**REAL-TIME MECHANICAL DIAGNOSTICS**

**FUEL MANAGEMENT**

**DRIVER'S MECHANICAL SKILLS**

**LOCATION BASED SERVICES**

**TEMPERATURE MANAGEMENT**

Point one is our revolutionary on board data mining unit that connects directly to the vehicle ECM (CANBUS, JBUS, OBD and more)

- Provides 100% accurate vehicle information automatically: miles, engine hours, acceleration, fuel consumption, RPM, engine temperature and more
- Installations are only 5 minutes in most cases
- Promotes the implementation of efficient vehicle maintenance systems
- Communicates with no human intervention
- Allows customization of downloaded data

## Data

Helpful data that is available with Point One...

- Engine hours
- Odometer reading
- RPM
- Over the road speed
- Oil temperature
- Coolant temperature
- Instantaneous fuel consumption
- Accelerator position
- Boost pressure
- Transmission output speed
- Transmission direction-forward, reverse, neutral
- Brake pedal position
- Key switch position
- Battery voltage
- Oil pressure
- Attention, warning indicator lights
- Water in fuel indicator
- Intake manifold temperature
- Fuel gage Receiving the most accurate and valuable data can save substantial money and in the long run that means more profit for you, our customer!!!!
